Docket No. 98N-1265

Food and Drug Administration

**I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.**

COMMENTS: After extensive research I discovered the best ERT for me  
was a specific compounded estrogen/progesterone combination. My  
physician agreed and although I cannot obtain this through my HMO,  
he willingly contacted a source which I found. This prescription comes  
from an out of state pharmacy which I chose because of its 20 year  
reputation and its history of research and high standards. Should a  
law be passed which hinders my ability to obtain this necessary  
medication, my health will be jeopardized. I urge you to reject any  
legislation which would restrict my (and my doctor's) choice of  
medication and my choice of pharmacy.
